Hydrobiologia **395/396:** v–vii, 1999.
D.M. Harper, B. Brierley, A.J.D. Ferguson & G. Phillips (eds), The Ecological Bases for Lake and Reservoir Management.

Contents

Preface ..... ix–x

Section 1: Twenty-first Century Challenges for Lake Management

Ecological challenges for lake management
by B. Moss 3–11
Economic challenges for lake management
by T. O'Riordan 13–18
Lake restoration: capabilities and needs
by S.R. Carpenter & R.C. Lathrop 19–28
Towards sustainable development of stillwater resources
by M. Everard 29–38

Section 2: Holistic Approaches to Successful Lake Restoration and Management

Understanding lake and catchment history as a tool for integrated lake management
by P.J. Johnes 41–60
Practical application of 25 years' research into the management of shallow lakes
by G. Phillips, A. Bramwell, J. Pitt, J. Stansfield & M. Perrow 61–76
Multiple techniques for lake restoration
by H. Annadotter, G. Cronberg, R. Aagren, B. Lundstedt, P.-Å. Nilsson & S. Ströbeck 77–85
Integrated management to restore macrophyte domination
by K. Donabaum, M. Schagerl & M.T. Dokulil 87–97
Direct and indirect mechanisms behind successful biomanipulation
by T. Kairesalo, S. Laine, E. Luokkanen, T. Malinen & J. Keto 99–106
Minimising the risk and amplifying the opportunities for restoration of shallow reservoirs
by M. Zalewski 107–114

Section 3: New and Refined Ecological Tools for Lake Management

Do reservoirs need ecological management?
by D.R.H. Price 117–121
Modelling phytoplankton dynamics and its application to lake management
by C.S. Reynolds 123–131

Modelling the ecological aspects of bankside reservoirs and implications for management
by J.A. Steel & A. Duncan 133–147
The importance of palaeolimnology to lake restoration
by R.W. Battarbee 149–159
Biological control of cyanobacteria: principles and possibilities
by D.C. Sigee, R. Glenn, M.J. Andrews, E.G. Bellinger, R.D. Butler, H.A.S. Epton & R.D. Hendry 161–172
Algal growth control by terrestrial leaf litter: a realistic tool?
by I. Ridge, J. Walters & M. Street 173–180
Aquatic macrophytes as tools for lake management
by A. Melzer 181–190
The central role of fish in lake restoration and management
by E.H.R.R. Lammens 191–198
The practical importance of the interactions between fish, zooplankton and macrophytes in shallow lake restoration
by M.R. Perrow, A.J.D. Jowitt, J.H. Stansfield & G.L. Phillips 199–210
Use of remote sensing and geographical information systems in developing lake management strategies
by S.M.J. Baban 211–226
Modelling catchment-scale nutrient transport to watercourses in the United Kingdom
by B. Shepherd, D. Harper & A. Millington 227–237

Section 4: Management Strategies for Different Lake Types

Saline lakes: integrating ecology into their management future
by F.A. Comín, M. Cabrera & X. Rodó 241–251
Understanding deep oligotrophic subalpine lakes for efficient management
by N. Salmaso, F. Decet & P. Cordella 253–263
Protecting the oligotrophic lakes of the English Lake District
by I. Zinger-Gize, A. Hartland, K.J. Saxby-Rouen & L. Beattie 265–280
The importance of inter-annual variability for management
by C. de Hoyos & F.A. Comín 281–291
The management of hypertrophic lochs: case studies in southwest Scotland
by F.H. Naysmith 293–307
Strategies for conservation management of lakes
by F.J. Madgwick 309–323
A reservoir in management-induced transition between ecological states
by P.W.G. Daldorph 325–333
Ecological principles for management techniques in deeper reservoirs
by B. Brierley & D. Harper 335–353
Ecological and ecophysiological impacts of ferric dosing in reservoirs
by S. Randall, D. Harper & B. Brierley 355–364
Shallow urban lakes: a challenge for lake management
by S. Birch & J. McCaskie 365–377

Life after lakes: the ecology and management of the water distribution network
by A.C. Smart & D.M. Harper 379–386

Section 5: Regional and National Strategies for Lake and Catchment Management

Legislative challenges for lake eutrophication control in Europe
by H. Wilson 389–401
Eutrophication control in the Netherlands
by D.T. van der Molen & P.C.M. Boers 403–409
A strategy for managing still waters in the United Kingdom
by M. Everard 411–417
Lake and catchment management in Denmark
by E. Jeppesen, M. Søndergaard, B. Kronvang, J.P. Jensen, L.M. Svendsen & T.L. Lauridsen 419–432
A quality classification for management of Scottish standing waters
by I. Fozzard, R. Doughty, R.C. Ferrier, T. Leatherland & R. Owen 433–453
Keeping pristine lakes clean: Loughs Conn and Mask, western Ireland
by M.L. McGarrigle & W.S.T. Champ 455–469
